Unaxis MATRIX

Unaxis MATRIX –
Making DVD Possible

Innovative Technologies

- Simple "Two motion" bonding
- Patented single metallizer solution for DVD 9
- Best performance in Sputtering Ag, Si and Au
- User friendly "tilt control", patent pending

Lowest cost of Ownership

- Simplicity means reduced maintenance costs, high reliability and uptime/availability
- Patented Silver solution
- One metallizer (Silver/Silver) means reduced initial investment cost

Simplicity throughout

- Intuitive user interface
- Self explanatory PPM (Product Productivity and Maintenance tool)
- "Plug and Play" additional sputtering

Highlights

Based on Unaxis world-leading sputtering systems, the Unaxis MATRIX is quite simply the best DVD production line available today.

Integrated Unaxis SWIVEL metallizer

Bonding plate

- This hassle-free and all-in-one modular system
- With an attractive and affordable design
- Including best-in-class components and performances to match
- Will bring you the lowest manufacturing cost per disc in the industry
